PROJECTS

Doctor Appointment Booking App using React JS

- This full-stack appointment booking system, built using React.js, Node.js, JavaScript, and Tailwind CSS, is designed for doctors and hospitals, featuring three levels of authentication.
- **Patient Login:** Allows patients to book and manage appointments with doctors.
- **Doctor Dashboard:** Enables doctors to view and manage appointments, track earnings, and update their profiles.

Oct 2024 - Present

Student Management System

- Developed a web-based system using Java and MySQL for managing student records.

E-commerce Website

- Built an online shopping platform using HTML, CSS, JavaScript, and MySQL, featuring product listings, shopping cart, and secure checkout
